

# Slate Select

A Superior Alternative to Slate

**Slate Select** is the product of extensive research, combined with twenty plus years experience in the cement matrix and construction industry. Precise moulding techniques inspired Slate Select to create this absolutely realistic substitute for slate roofing.

All Slate Select is produced at our 35,000 square foot facility in Garland, Texas, where products quality is monitored but Omega Point Labs. Slate Select, Inc proudly offers a product that blends perfectly the beauty of natural slate with state of the art technology.

## Slate Select meets or exceeds all major building code requirements.

We offer a guide to installations showing suggested tools and equipment as well as installation methods.

Dimensions, weight and colors are subject to normal manufacturer's variations. Slate Select offers a 40 year pro rated warranty.

## Extensive testing assures you of the following superior qualities of Slate Select

**Fireproof-** Non-combustible Class A or Class B fire rating as installed per specs.

**Durability-** Due to its low absorption, Slate Select is freeze-thaw resistant and resistant to insect and rot infestation.

**Strength/Weight-** High strength with light weight is obtained with reinforcing glass fibers. Slate Select is as durable as slate but lighter in weight. It is may be walked upon without breakage.

**Authentic in Color and Appearance-** Use of integral color with iron oxide pigments and molding with real slate give Slate Select its authenticity.

**Maintenance-** Due to its non-pours nature, Slate Select experiences no shrinkage or warping. It requires little or no maintenance.

**Installation-** Pre-notched for ease of nailing, it may also be applied similar to wood shingle roofing. In areas of high wind, the shingles may be additionally nailed to meet code requirements. It is imperative any installation be held with an experienced, reputable roofing installer.

**Quality Control-** Slate Select quality control is monitored by Omega Point Laboratories, Inc.

## The Product:

Slate Select provides a more durable, lighter weight and authentic substitute for slate roofing. Slate Select is a proprietary cement matrix with reinforcing non-alkaline glass fibers. This produces a material with great strength and durability in adverse climate conditions. Cast in moulds made from pieces of natural slate, it appears identical to real slate even close up!

The color variations offer countless design choices. This combined with the test superior durability, creates the most elegant, yet practical roofing product on the market today.

# The Most Elegant Yet Practical Roofing Product On The Market Today!
